

## **CHIEF GEOLOGIST/EXPLORATION MANAGER – Northern British Columbia, Canada**

### **Company Overview**

Our client is a private Canadian Company, exploring and developing metallurgical coal properties in Northeastern British Columbia, Canada.

The Company has approximately 94,000 hectares under license to mine.

This Company is positioned to be the first Company in the world to mine coal from narrow, steeply dipping seams, using a uniquely designed ADCAR; specifically customized for this purpose.

This will ensure that coal is mined in a safe, cost effective, environmentally conscious and responsible manner.

The position will report in to the CEO, and will be based in Chetwynd in Northern BC, Canada.

The Company offers an attractive compensation package, commensurate with qualifications and experience.

### **Responsibilities:**

- Managing the full Drilling and Exploration program.
- Direct the Geology of the program.
- Resolving problems and issues that unfold with regards to Geology and the Exploration program.
- Data handling.
- Plan and execute the mine exploration program with the objective of adding resources to the existing reserves.
- Lead a team of mining professionals and field crew, with an emphasis on mapping, target definition and drilling.

### **Qualifications:**

- A degree in Geology.
- Solid management experience.
- Specific, relevant experience in coal mining – at least 10-15 years.
- Excellent data modeling and computer skills.
- A proven track record of having led successful Exploration and Drilling programs.

### **Core Competencies:**

- Able to strategize and prioritize to effectively meet short- and long-term goals.
- A collegial and easygoing management style.
- An excellent team player, who fosters positive relationships and is able to work

- harmoniously with all kinds of people in a productive way.
- Excellent communication and interpersonal skills.
  - The successful candidate should be results-oriented and have a strong sense of urgency.
